**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Response to Amendment***

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Pommier (FR 2616510 A1).

Pommier discloses a valve control device comprising a camshaft surrounded by a rotary cam 1 provided with an eccentric or asymmetrical frontal groove 2 of ellipsoid shape accommodating a cam follower or cylindrical pin 7, the cam 1 having lift and descent ramp portions 4, 5 to convert rotary movement of the cam to reciprocating linear movement of through a rocker or connecting rod 6 to open and close valve stems 10, 11 (see English translation abstract, page 1 and top of page 2, and Figure).

***Response to Arguments***

3. Applicant's arguments filed 7 January 2005 have been fully considered but they are not persuasive.
4. Applicant argues on the bottom of page 4 that the horizontal connecting rod of Pommier is not the same as the rocker arm of the instant application. Examiner disagrees. Webster's

Art Unit: 3748

Ninth New Collegiate Dictionary defines “rocker arm” as “a center-pivoted lever to push an automotive engine valve down”, which is clearly described by Pommier and shown in the Figure.

With regard to applicant’s argument at the top of page 5 indicating that Pommier must actuate two valves while the instant application is designed to actuate a single valve, the examiner is required to interpret the claimed language in the broadest sense, and the applicant has not specified only a single valve to be actuated. Furthermore, specification of such, in the opinion of the examiner, would not render claim 4 patentable over Pommier since every other disclosed feature is present and the particular design relation to the rocker arm and single valve is well known in the art.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
